

Processing and care instructions

synthetic leather decovin®

Processing

The synthetic leather decovin® allows for problem-free processing with all techniques commonly used in the upholsterer trade. These include: Sewing, gluing, stapling, nailing and high frequency welding. Mark with chalk or pencil only; do not use pens or markers as ink might penetrate through to the surface. Do not use solvent-based adhesives, as these might cause migrations and the separation of the backing layer. Do not use leather sewing needles in order to avoid harming the surface. Do not use this synthetic leather for exposed edges or piping as it might easily be damaged during use.

Note that the stretch values differ for warp and weft when working with this material. Use a padding of high quality foam or fleece to protect the material from the structural elements.

Cleaning and care

decovin® is very easy to care for. With regular and careful maintenance your enjoyment of this product is guaranteed to last for a long time.

For basic cleaning it is enough to regularly wipe the material with a normal damp cotton cloth or a soft brush. When there are heavier stains you can add a mild soap water solution. Always refer to the manufacturer's dosage instructions and test the product first on a concealed spot. Afterwards remove detergent residue with tepid water and rub dry with a soft cloth. Do not use cleaners or care products which are abrasive or contain solvents, alcohol, fat or oil. Stains like oil, fat, coffee and ink, as well as rub off from textiles, must be removed right away, as they can penetrate into the material. decovin® cannot be chemically cleaned.

Rub off from textiles like jeans or other materials which are not color fast is excluded from any warranty.

Recommended products and specialists

- For appropriate cleaning and care we recommend the "Leatherette Care Kit" by the company Uniter S.p.A. www.uniter.com.
- As a specialist company for cleaning and repair work we recommend for Switzerland: LPRS GmbH www.lprs-reparaturservice.ch, Germany: Lederzentrum GmbH www.lederzentrum.de, Austria: WILPA www.wilpa.at
